

*American Osteopathic Academy  
of Addiction Medicine Presents*

## **Office Based Opioid Therapy (OBOT) Utilizing Buprenorphine**

**JUNE 19, 2003  
ORLANDO, FLORIDA**

*Program Chair:*  
**ANTHONY DEKKER  
DO, FAOAAM**

After participating in this course, the attendees will be able to understand the new federal Drug Abuse Treatment Act of 2000 (DATA 2000), which lists the criteria needed for the Office Based Opioid Treatment (OBOT) utilizing Buprenorphine (BUP).

Under the new law, physicians can now utilize Schedule III, IV and V narcotic controlled substances by prescribing or dispensing approved drugs in office settings.

Currently, the only drug approved by the FDA is BUP.

Physicians can apply for a waiver to qualify for the use of BUP for addicted patients with

certain provisions after completing eight hours of training in the use of the drug by three qualified addiction medicine organizations, of which AOAAM has played a leadership role.
